

Vesta GB2 video kit (Nexa)

This kit has a 1.8 mm extruded aluminium door panel of modular design. Designed for ease of installation with internal modules connected through flat cables and pre-wired buttons.

The information / camera window is manufactured in polycarbonate with steady illumination at the door panel through white LED's.

The camera/sound module has a wide angle CCD colour camera (104°) with electronic iris and light emitters for night vision. Message broadcasting and coloured icons acknowledge the system status (call in progress, in communication, lock is activated or the system is busy).

Supplied with **Vesta2** hands free monitors with electronic call. A surface mounting unit with a 4.3" colour TFT LCD of "A Grade" quality. It has capacitive touch buttons, two direct function buttons and OSD menu. Features include; intercom, preview and auto switch on functions; privacy on audio, video and door open progresses; input for doorbell apartment push that saves the use of a separate doorbell.

Kits are designed and supplied for connection over 2 wires.
Kits come as standard with a flush mounting panel.
Other mounting options available.

Up to 3 additional GB2 units, audio or video, can be used in the same apartment without additional power supplies.
